Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 has been rejected under 35 U.S.C. 102(b) as being clearly anticipated by Crocker, 353925.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 has been rejected under 35 U.S.C. 103(a) as being unpatentable over Romano, 2450358 in view of Crocker.

Romano discloses the method steps of making a first pass of a free end of a rope through the eyelet (11), wrapping the rope around the shank (12) of the hitch in a proximate position to the eyelet (at 21), making a second pass of the rope through the eyelet so that the second pass of the rope overlies the first pass (at 22) and tensioning the rope and securing the rope (at 18) with respect to a remote tie down point (19).

Romano fails to disclose the claimed hooks being co-planar to the eyelet. One of Romano's hooks (14) extends outside of the plane that is co-planar with the eyelet and

the other hook (17). Crocker discloses a plurality of hooks that are co-planar with the eyelet of the hitch (D, E in figure 2). The hook in Crocker performs the same function as the pulley hook (14) in Romano, i.e., securing and allowing a rope to pass over the hook in a securing arrangement. Furthermore, Crocker's hook is a simpler design, which allows one to manufacture the hitch faster and at a lower cost, i.e., Crocker's hitch doesn't require the assembly steps as in Romano. Therefore, it would have been obvious to a person having ordinary skill in the art to use a hitch that has coplanar hooks with respect to the eyelet in order to reduce the cost of manufacturing the hitch by eliminating the assembly steps required to make Romano's hitch.

Allowable Subject Matter

5. Claim 3 has been objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
